

EstateDocs

Attorney-drafted estate documents in 72 hours at half the cost.

The Problem: Creating an estate plan can be a time consuming and frustrating project. Some families rely on full-service law firms, waiting weeks or even months for signature-ready documents that in many cases cost more than \$6,000. Other families opt for online Do-It-Yourself estate drafting services to save money, but these web-based solutions lack professional guidance. Finally, an estimated one-third of individuals with net worths between \$1m and \$10 million never establish an estate plan and die intestate, leaving the allocation of their assets to state law.

The Solution: Anodos Law offers affordable, attorney-drafted estate documents for families with estates between \$1m and \$10 million, delivered in just 72 hours at half the cost of traditional full-service law firms.

The Service: Our *EstateDocs* service begins with an online consultation between an Anodos Law attorney and the Trustors – the persons establishing the trust. During this interview, we'll learn about your estate assets, who you want to inherit them, and any preferences or family circumstances that need to be addressed in the plan, such as blended families, special needs beneficiaries, difficult-to-value assets, and more. Immediately following our intake call we begin to draft the estate documents. Within 72 hours, we will deliver to you a personalized estate plan tailored to your family's specific needs. Our comprehensive *EstateDocs* package includes a Revocable Living Trust, Pour Over Wills, Powers of Attorney, Healthcare Directives, and other needed documents.

The Cost: The cost for the *EstateDocs* service is **\$3,150**, which is half the cost of many traditional law firms. We will provide coaching and model documents if you want to fund the trust on their own; or for a fixed fee of \$300 per asset, we can help facilitate updated deeds on real estate, changing title of accounts and assigning business interests and personal property to the trust.

What Makes Us Different: We believe that the drafting of estate plans for families with net worths of less than \$10 million doesn't need to be complicated, expensive or time consuming.
